

Getting to Know the Britax **CLICKTIGHT** Convertible Car Seats

Continuing Education Unit

Getting to Know the Britax CLICKTIGHT Convertible Car Seats

- When you have completed this Continuing Education Unit session you will:
 - ✓ Have an understanding of the product features that BRITAX CLICKTIGHT convertible seats include.
 - ✓ Be familiar with the weight, height and age requirements for BRITAX CLICKTIGHT convertible seats including use of the CLICKTIGHT Installation System.
 - ✓ Have a general understanding of the installation of BRITAX CLICKTIGHT convertible seats rear-facing.
 - ✓ Have a general understanding of the installation of BRITAX CLICKTIGHT convertible seats forward-facing.
- For this CEU opportunity, you must answer **16** out of **20** questions correctly in order to get the one (1) CEU awarded. If you incorrectly answer more than **4** questions, then you may review the material again and retake the quiz.
- Much of the information in this CEU material can be found at us.britax.com and in the user guide for the Britax One4Life.

The Car Seat
GAME CHANGER

CLICK  **TIGHT**
INSTALLATION

Why ClickTight® is a Game Changer

1.

Quick easy
access to the
belt path

2.

Installs simply
with just vehicle
seat belt

3.

Built-in tensioner eliminates
installation struggle

CLICKTIGHT Installation Technology

1

CLICKTIGHT does not require any pushing or pulling to tension the vehicle belt or compress the vehicle seat.

2

Installation with a vehicle seat belt is preferred / recommended over lower anchors

3

ALWAYS release vehicle buckle BEFORE opening CLICKTIGHT when removing from vehicle.

Child Fitment

- Britax strongly recommends that children ride rear facing to the highest weight or height specified.
- Britax strongly recommends that children should be secured with a harness system until they exceed the weight or height limits specified.

Forward Facing: 20 – 65 lbs (9.1 – 29.4 kg)

Britax strongly recommends that children should be secured with a harness system until they exceed the weight or height limits specified.

Use forward facing:

- with harness straps in the closest position above the child's shoulders, parallel to level ground **and**
- with children who weigh 20 – 65 lbs (9.1 – 29.4 kg) **and**
- who are 49 in. (124.5 cm) or less in height **and**
- **ADVOCATE/BOULEVARD ONLY:** when the top of the ears are below the top of the head restraint (left illustration) **or**
- **MARATHON ONLY:** when the top of the ears are below the top of the head pad (right illustration).

Rear Facing: 5 – 40 lbs (2.3 – 18 kg)

Britax strongly recommends that children ride rear facing to the highest weight or height specified.

Use rear facing:

- with harness straps in the closest position below the child's shoulders **and**
- with children who weigh 5 – 40 lbs (2.3 – 18 kg) **and**
- when the top of the child's head is at least 1 in. (2.5 cm) below the top of the head restraint (**ADVOCATE/BOULEVARD**) or head pad (**MARATHON**).

CLICKTIGHT Convertible Features

CLICKTIGHT Convertible Features

CLICKTIGHT Convertibles have 7 recline positions. To adjust the recline position; Pull the recline handle then rotate the child seat shell until the ball in the recline indicator is in the allowable section for the child.

NOTE: Set the seat position **BEFORE** installing.

Rear-Facing

In rear-facing installations it is important that the child seat be reclined to maintain proper head and neck control with smaller infants. Use the recline indicator on the child seat to help achieve an acceptable recline angle, with the ball in the recline indicator in the allowable blue section for the size of the child. If necessary, the proper recline angle can be achieved by placing a rolled towel or pool noodle in the vehicle seat bight.

Recline

Infants and children with no head and neck control - recline indicator ball **MUST BE** in the light blue section

Older children with proper head and neck control - recline indicator ball **CAN BE** in light blue or dark blue.

NOTE: If necessary, the proper recline angle can be achieved by placing a rolled towel or pool noodle in the vehicle seat bight.

Adjusting the Harness Length

Prior to August 2017 User Guide indicated:

NOTE: Harness length can be extended if necessary for children over the age of 2.

Car seat should be replaced.
See user guide.

britax

One side of the harness isn't tightening as tight as the other. What could it be?

1

- Check to make sure BOTH hip anchors are securely attached in the SAME positions (short (standard) length or long length) and routed correctly.

2

- Check to make sure there is no excess slack from the harness trapped under the seating area.

[CLICK HERE](#) for How to Fix Uneven Harness video

When trying to uninstall a CLICKTIGHT convertible, the CLICKTIGHT dial will not turn to open. What is wrong?

When uninstalling a BRITAX car seat with CLICKTIGHT Installation Technology, always release the vehicle seat belt buckle first. This relieves the tension on the dial allowing it to open easily.

[CLICK HERE](#) for How to Uninstall a CLICKTIGHT Installed with seat belt

How do I know which buckle position to use?

[CLICK HERE](#) for How to Adjust the Harness Buckle Position

Harness Buckle Position

The child seat shell contains an inner buckle slot and an outer buckle slot.

- For rear-facing installations, position the buckle in the slot closest to but not under the child.
- For forward-facing installations, use the outer buckle slot only.

Reposition the harness buckle by following the steps on pages 38-39.

NOTE: NEVER leave the buckle in the adjustment slot.

Are the Impact Absorbing Chest pads required on CT convertibles?

Securing Your Child

IMPORTANT: Impact absorbing chest pads are highly recommended for forward-facing mode. Removal of chest pads is optional for rear-facing mode to ensure a snug fit for small infants.

Select models of CLICKTIGHT convertibles do not come with chest pads.
(typically black shells)

This slide pertains specifically to CLICKTIGHT convertibles.

© 2018 Britax Child Safety, Inc. All rights reserved

Where is the serial number and manufacture date on CLICKTIGHT convertibles?

Under child's left knee | may or may not need to open CLICKTIGHT

Tether attached during an impact?

This is one indicator the seat should be replaced.

Can a Britax car seat be installed in the center seating position borrowing the inner anchors (LATCH) of the outboard seating positions?

No. To use lower anchors / LATCH, it must be a designated LATCH position by the vehicle with standard spacing.

Using the Lower Anchors and Tethers for Children (LATCH)

The Lower Anchors and Tethers for Children or LATCH, is a system available on this child restraint that offers an alternative to vehicle seat belt installation methods. The figure above shows typical locations for lower anchors and tether anchors in a vehicle. See pages 2-3 for LATCH components on this child restraint.

→ Check your vehicle owner's manual to learn if it is equipped with LATCH, the maximum weight rating for the lower anchors, tether anchors capacities, and information on the lower anchor locations and designated seating positions available for use with this child restraint.

Tether anchor locations vary from vehicle to vehicle. Check your vehicle owner's manual and look for the tether anchor symbol shown in the diagram to help identify where the top tether anchor point is located in your vehicle.

How much overhang is acceptable with any Britax car seat?

Harness Mode

- It is important that the base of the child restraint rests completely flat on the vehicle seat with no side overhang.
- It is permissible to allow up to 3 in. (7.6 cm) of the base to hang over the front edge of the vehicle seat.
- Side overhang is not permitted.

Booster Mode

- Overhang is not allowed in booster mode. In booster mode, the base of the child restraint must fit completely on the vehicle seat.
- Side overhang is not permitted.

When do Britax car seats expire?

Safety Information

Warnings

⚠ WARNING!

Failure to follow all warnings and instructions on the restraint system could result in **SERIOUS INJURY or DEATH.**

Carefully read all the instructions in this user guide and on the child restraint before using this product. Keep this user guide in the user guide storage pocket under the seat cover for future use.

FIT REQUIREMENTS

- Use **ONLY** in **REAR**-facing position when using it with an infant weighing less than 22 lb (10 kg).
- Use in harness mode **ONLY** with children who weigh between 5 and 65 lb (2.3 and 29.5 kg) and whose height is 49 in (124.5 cm) or less.
- Use **REAR**-facing for children who weigh between 5 and 50 lb (2.3 and 22.7 kg).
- Use **FORWARD**-facing with a harness for children who weigh between 22 and 65 lb (10 and 29.5 kg).
- Use in **BOOSTER** mode only with children who weigh between 40 and 120 lb (18.1 and 54.4 kg) and whose height is between 44 and 63 in (111.8 and 160 cm).

INSTALLATION

- Secure the top tether strap provided with this child restraint for **FORWARD**-facing harness mode.
- Car seat base **MUST** be flat on vehicle seat and **MUST** be parallel to vehicle seat.
- Snugly adjust the belts provided with this child restraint around your child.
- Use only the vehicle's lap and shoulder belt system when restraining the child in this **BOOSTER** seat. Never secure a child with a lap belt only in **BOOSTER** mode.
- Use only the "B" recline position when using child restraint in **BOOSTER** mode.
- For models with anti-rebound bar, the anti-rebound bar **MUST** be removed for **FORWARD**-facing.

GENERAL USE

- Secure this child restraint with the vehicle's child restraint anchorage system, if available, or with a vehicle seat belt.
- Register your child restraint with the manufacturer.
- The headrest cover **MUST** be unfolded for children weighing 9.1 kg (20 lb) or more.
- The provided infant position pillow **MUST** be removed for children weighing 9.1 kg (20 lb) or more.
- When not in use, the lower anchor adjuster and strap **MUST** be stored in the storage pouch inside of the seat.

NOTES:

- Britax strongly recommends that children should remain in a child seat with a 5-point harness until reaching the **maximum weight or height allowed**.
- To prevent injury due to deterioration or hidden damage, discontinue use of this child restraint if it is older than ten (10) years. See the Serial Number and Manufactured Date Label on the child restraint.
- Before each use, check this child restraint and its components to make sure they are in good condition and good working order.
- Discontinue use of this child restraint if it has been in a moderate or severe crash. It is not necessary to replace a child restraint after a **minor** crash, defined by the US National Highway Traffic Safety Administration (NHTSA) as:
 - The vehicle is drivable from the crash site; **and**
 - The vehicle door nearest to the child restraint was not damaged; **and**
 - No vehicle occupants were injured; **and**
 - There is no visible damage to the child restraint; **and**
 - The airbags (if present) did not deploy.
- ALWAYS** make sure the child restraint system is secured to the vehicle, even when unoccupied, since in a crash, an unsecured child restraint system may injure occupants.
- Verify that the child restraint and child restraint belts or straps do not interfere with the opening and closing of the vehicle door.
- Consult vehicle user guide to ensure child restraint installation does not interfere with function of vehicle seats.
- Snugly adjust the belts provided with the child restraint around your child.
- Ensure the lower harness (waist) straps are firmly adjusted in a position so that the child's pelvic area is secure.
- Ensure the upper harness (shoulder) straps are firmly adjusted so that the child is secure.
- The use of non-Britax covers, inserts, toys, accessories or tightening devices is not approved by Britax. Their use could cause this child restraint not to perform as intended in a crash.
- Cover the child restraint when the vehicle is parked in direct sunlight. Metal parts of child restraint could become hot enough to burn a child.
- Store the child restraint in a cool and dry place when it is not being used. Avoid placing heavy objects on top of it.
- Do not attempt to disassemble any part of the child restraint or change the way the harness or vehicle's seat belts are used, except as described in this booklet.

The statement for number of years will be found in the Warnings / Note section of user guide.

For newer models, it can also be found on the serial number label.

Installation of a BRITAX car seat when vehicle head restraint causes interference.

Vehicle Headrest

⚠ WARNING!

In some cases, the vehicle headrest can prevent the child restraint headrest from being raised high enough to properly adjust the harness for the fit of your child when using a forward-facing reclined position. DO NOT force the child restraint headrest past the vehicle headrest. Doing so could cause the child restraint not to perform as intended. If the location of the vehicle headrest interferes with the child restraint headrest, raise or remove the vehicle headrest. If the vehicle headrest can not be removed, move the child restraint to the upright position or try a different seating location.

Can Britax car seats and booster seats be installed with Inflatable Seat Belts?

Please see our Inflatable Seat Belt Policy – <https://us.britax.com/service-support/inflatable-seat-belt-policy/>

Not all models of BRITAX car seats are approved for use with inflatable seat belts. At this time, ONLY the Ford Motor Company (Ford and Lincoln vehicles) Inflatable seat belt system is approved for use with the following BRITAX models: **B-SAFE, Britax G Series Convertibles (Roundabout, Marathon, Boulevard, Advocate), Pioneer 70, Pioneer, Frontier, Frontier 85, Frontier 90, Frontier CLICKTIGHT, Pinnacle 90, Pinnacle CLICKTIGHT, Parkway SG and Parkway SGL.**

If your car seat model is not listed above, it is NOT approved for use with the Ford inflatable seat belt system or any other inflatable seat belt system.

For more information on Inflatable seat belts, please [click here](#).

In User Guides | COMPATIBLE SEAT BELTS

NOTE:
This BRITAX car seat may not be compatible with every inflatable lap-shoulder belt.

See FAQs in the support section of the BRITAX website (<https://www.britax.ca/faqs> OR <https://us.britax.com/faqs/installation-questions/>) for additional instructions.

Crotch Rolls & Side Rolls

ANSWER:

BRITAX rear-facing only and convertible car seats provide positioning inserts with the car seat. As well, offer multiple crotch buckle positions to assist in properly positioning and securing the child in the harness system.

If the positioning insert provided with the BRITAX car seat does not position the child as needed, it is acceptable to place a rolled receiving blanket on each side of the child for lateral support – once the child is properly secured within the harness as instructed in the user guide. The rolled receiving blankets should not be placed between the child and the harness.

It is **not** acceptable to use a crotch roll with any BRITAX car seat to position a child.

Replacement after a Motor Vehicle Crash

Discontinue use of this child seat if it has been in a moderate or severe crash. It is not necessary to replace a car seat after a minor crash, defined by the US National Highway Traffic Safety Administration (NHTSA) as:

- a. The vehicle is drivable from the crash site; and
- b. The vehicle door nearest the child seat was not damaged; and
- c. No vehicle occupants were injured; and
- d. There is no visible damage to the child seat; and
- e. The airbags (if present) did not deploy

This information can be found in each Britax product user guide in the WARNINGS or IMPORTANT NOTES section.

Coats | Heavy Clothing

BULKY COAT

LOOSE HARNESS

The following is in each BRITAX user guide in “Securing the Child”.

IMPORTANT: Remove bulky coats and/ or jackets before putting the child in the car seat.

- Some suggestions would be:
 - Preheat car.
 - Put jacket on backwards after child is secured in harness.
 - The B-WARM can be used with any Britax rear-facing only seat.

- Make sure your car seats is approved for use on aircraft. Look for statement on label:
 - This restraint is certified for use in motor vehicles and aircraft.
 - Belt-positioning booster seats a NOT approved for use on aircraft.
- Best practice is EVERY family member has a seat and is properly secured (seat belt or car seat. While the FAA allows children under the age of 2 to be held on lap, remember – turbulences are unexpected at any time.
- Call airlines and ask if there are discounts for seats for children flying during non-popular times or flights.
- By bringing YOUR car seat with you – you do not have to worry about renting a car seat from a car rental agency.

Thank you for learning more about BRITAX!

- Please [CLICK HERE](#) to take the quiz for the Getting to Know the Britax Belt-Positioning Booster Seats CEU Opportunity.
- Once you complete the quiz, you will receive your results via email.
- If you do not receive an email regarding your score in a timely fashion: (a) check your spam/junk folder and (b) consult your IT department that the system will allow emails from ceuquiz@britax.com.
- If you successfully completed the quiz, please save the email or print a copy and save with your recertification documentation.
 - ✓ The emails come from wordpress@ceu.britaxusa.com. If you do not receive within 24-48 hours, please check your spam and junk folders. Some systems have been known not to deliver them to your inbox.
 - ✓ Certificates/emails of completion cannot be re-created.
- If you did not successfully complete the quiz, please review the material again and retake the quiz when you are ready.
