

In the spirit of continuous improvement, BRITAX has revised the lock-off installation method for all BRITAX U.S.A. next generation convertible car seats (ROUNDABOUT 55, MARATHON 70, BOULEVARD 70, BOULEVARD 70 CS, ADVOCATE 70 CS), allowing you to use only the lock-off closest to your vehicle seat buckle instead of requiring you to use both lock-offs. This change applies to both rear- and forward-facing installations and eliminates the occasional convenience button interference issues that have been observed. This change only applies to U.S.A. car seats; Canadian child seats have always been produced utilizing the single lock-off installation method.

What is a convenience button?

The convenience button is a small plastic button or sometimes a piece of folded vehicle seat belt on your vehicle shoulder belt that keeps the latch plate from sliding down into the bight (crack) of your vehicle seat.

Different actions may be required depending on when your child seat was manufactured. To determine when your child seat was manufactured, refer to the images below.

If your seat was manufactured before July 30, 2010:

- Your child seat user guide will instruct you to use both lock-offs when installing your seat using the vehicle seat belt.
- If you are **NOT** experiencing any issues, including interference from the convenience button, then you may continue to use both lock-offs.
- If you would like to install your seat using one lock-off, please contact the BRITAX customer service department (888-427-4829) to receive a free conversion kit.

If your seat was manufactured on or between July 30, 2010 and October 4, 2010:

- Your child seat user guide will instruct you to use both lock-offs when installing your seat using the vehicle seat belt.
- If you are **NOT** experiencing any issues, including interference from the convenience button, then you may continue to use both lock-offs.
- If you would like to install your seat using one lock-off, your car seat lock-offs have been manufactured to allow for single lock-off use. Please refer to the *Alternative User Guide - Single Lock-Off Version* or the Instructional Demo featuring *Single Lock-Off Installation Instructions* found on the *Installation Videos & User Guides* page of our website (<http://www.britaxusa.com/customer-service/user-guides>) for instruction on how to install your seat using one lock-off. You may also obtain a free printed version of this revised user guide by contacting the BRITAX customer service department (888-427-4829).

On most BRITAX convertible car seats, the serial number and manufacture date are located on the child's left hand side.

On the ADVOCATE 70 CS car seat, the serial number and manufacture date are located on the child's left hand side behind the Side Impact Cushion.

If your seat was manufactured on or after October 5, 2010:

- Your child seat user guide will instruct you to use one lock-off when installing your seat using the vehicle seat belt.
- No further action is required.
